DATA PUBLISHERS

GBIF enables *free and open access to biodiversity data online.*

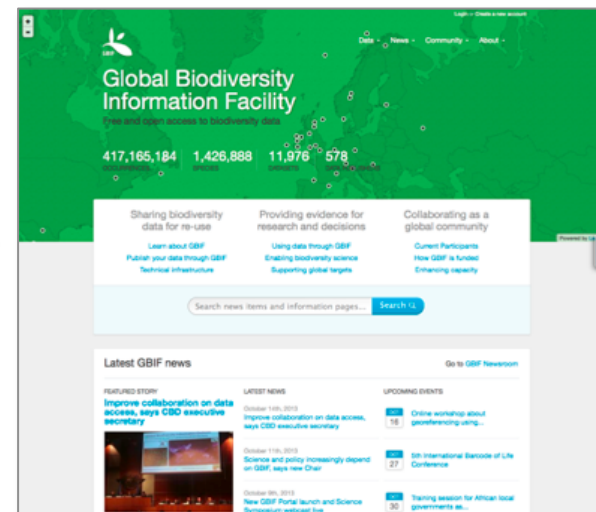

We are an international government-initiated and -funded initiative focused on making biodiversity data available to all and anyone, for scientific research, conservation and sustainable development.

# GBIF provides a data discovery system

*that is dependent on resolvable stable identifiers for efficient functionality*

global registry

data portal

## Summary

### FULL TITLE

imr\_mareano\_beamtrawl

### DESCRIPTION

Data collected with a 2m beamtrawl towed about 200-300m. Dataset contains numbers and combined wet weight of specimen (down to 1 mg) within same species or higher taxonomic unit. Samples are preserved on formalin and then alcohol. After id the material is stored at the Bergen Museum, Bergen, [Norway](#).

# **Data citation with DOI**

# SCHOLARLY DATA CITATION IS GOOD RESEARCH PRACTICE

- **Data citation** integrated part of the scholarly system
- Supporting research **validation** and **reproducibility**
- **Enable reuse** of research output and results
- **Tracking impact** of published data
- Scholarly structure to **reward and credit people** involved in producing research data

# DOI – DIGITAL OBJECT IDENTIFIER

Persistent resolvable identifiers

Standard for scholarly journal papers

Simplify citation of references

Used for **measuring impact**

# WHO HAS CITED YOUR DATA RESOURCE?

CrossRef services link citations between scientific journal articles

*With CrossRef you can discover who has cited your research paper!*

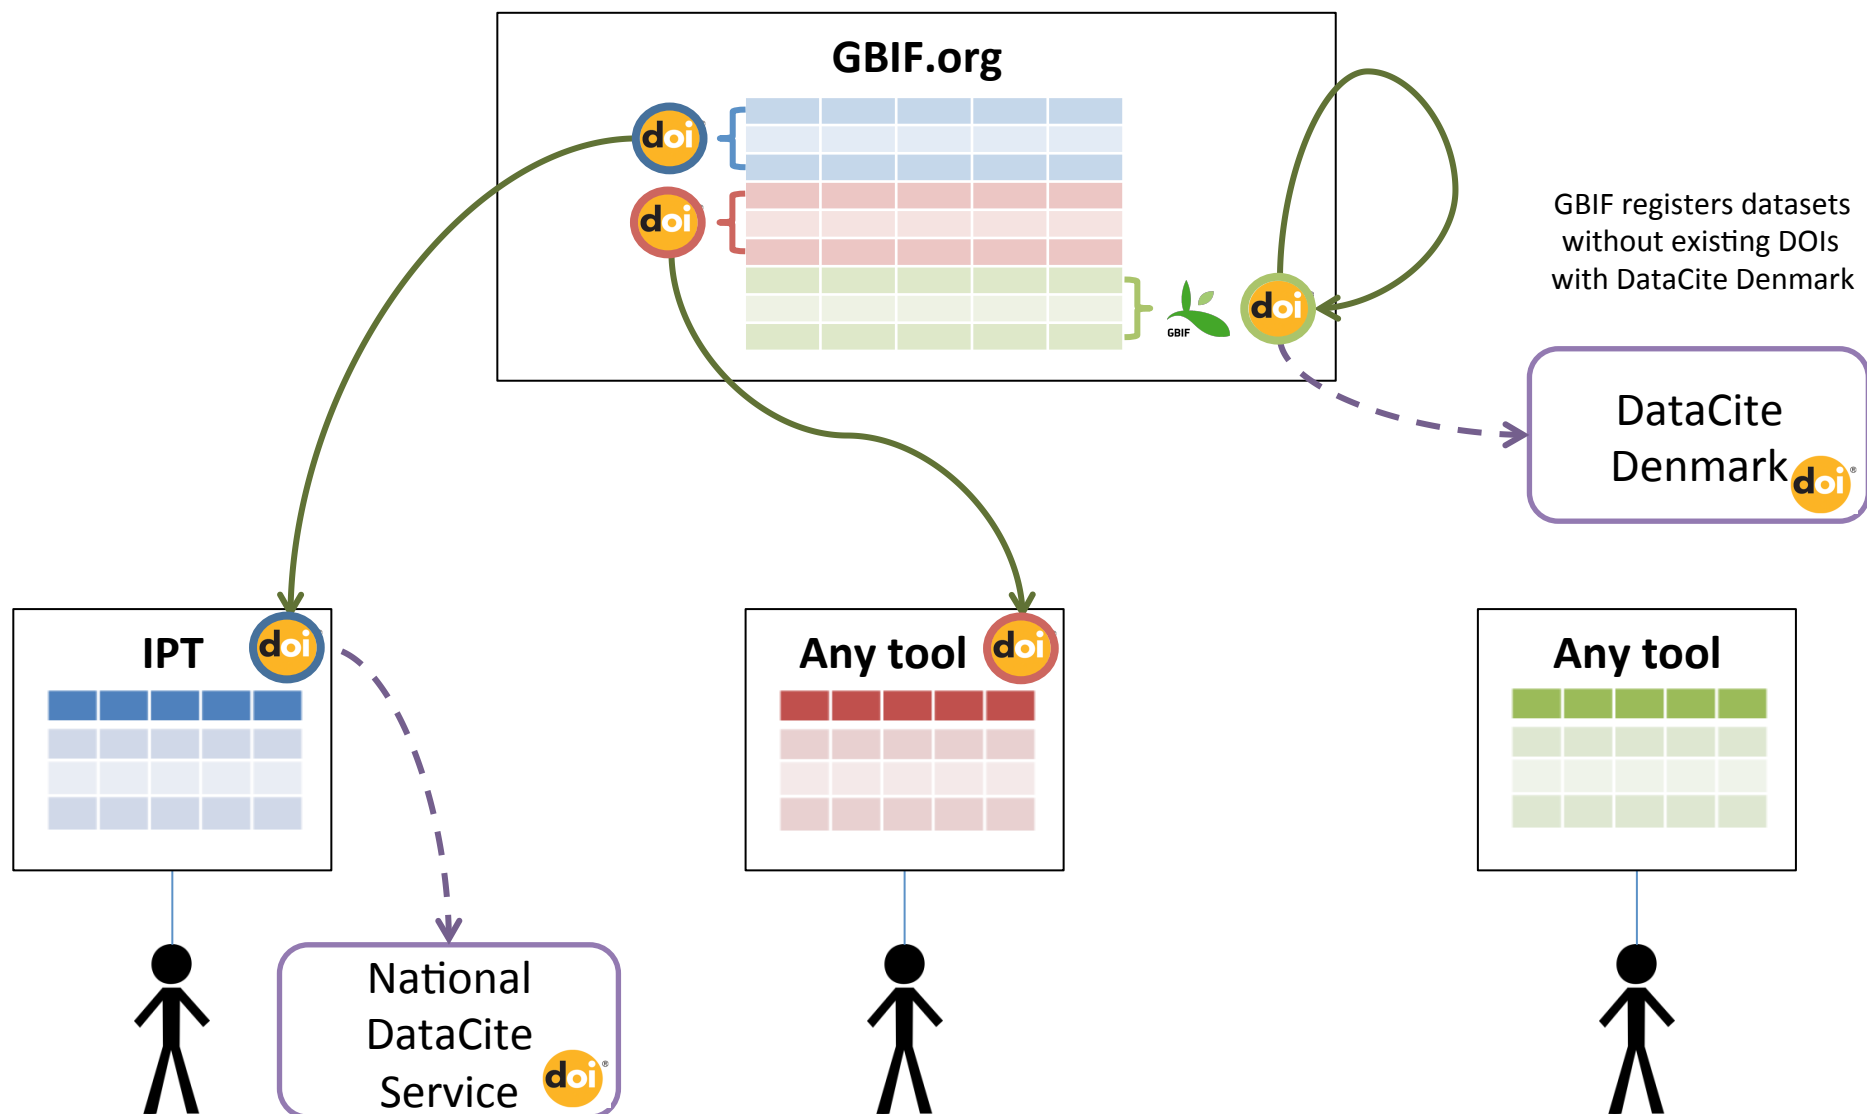

Services to link dataset citations (DataCite DOI) with CrossRef systems

*Towards services in CrossRef to discover who cited your research data ...*

<http://blog.crossref.org/?s=DataCite>

# GBIF & DIGITAL OBJECT IDENTIFIERS (DOI)

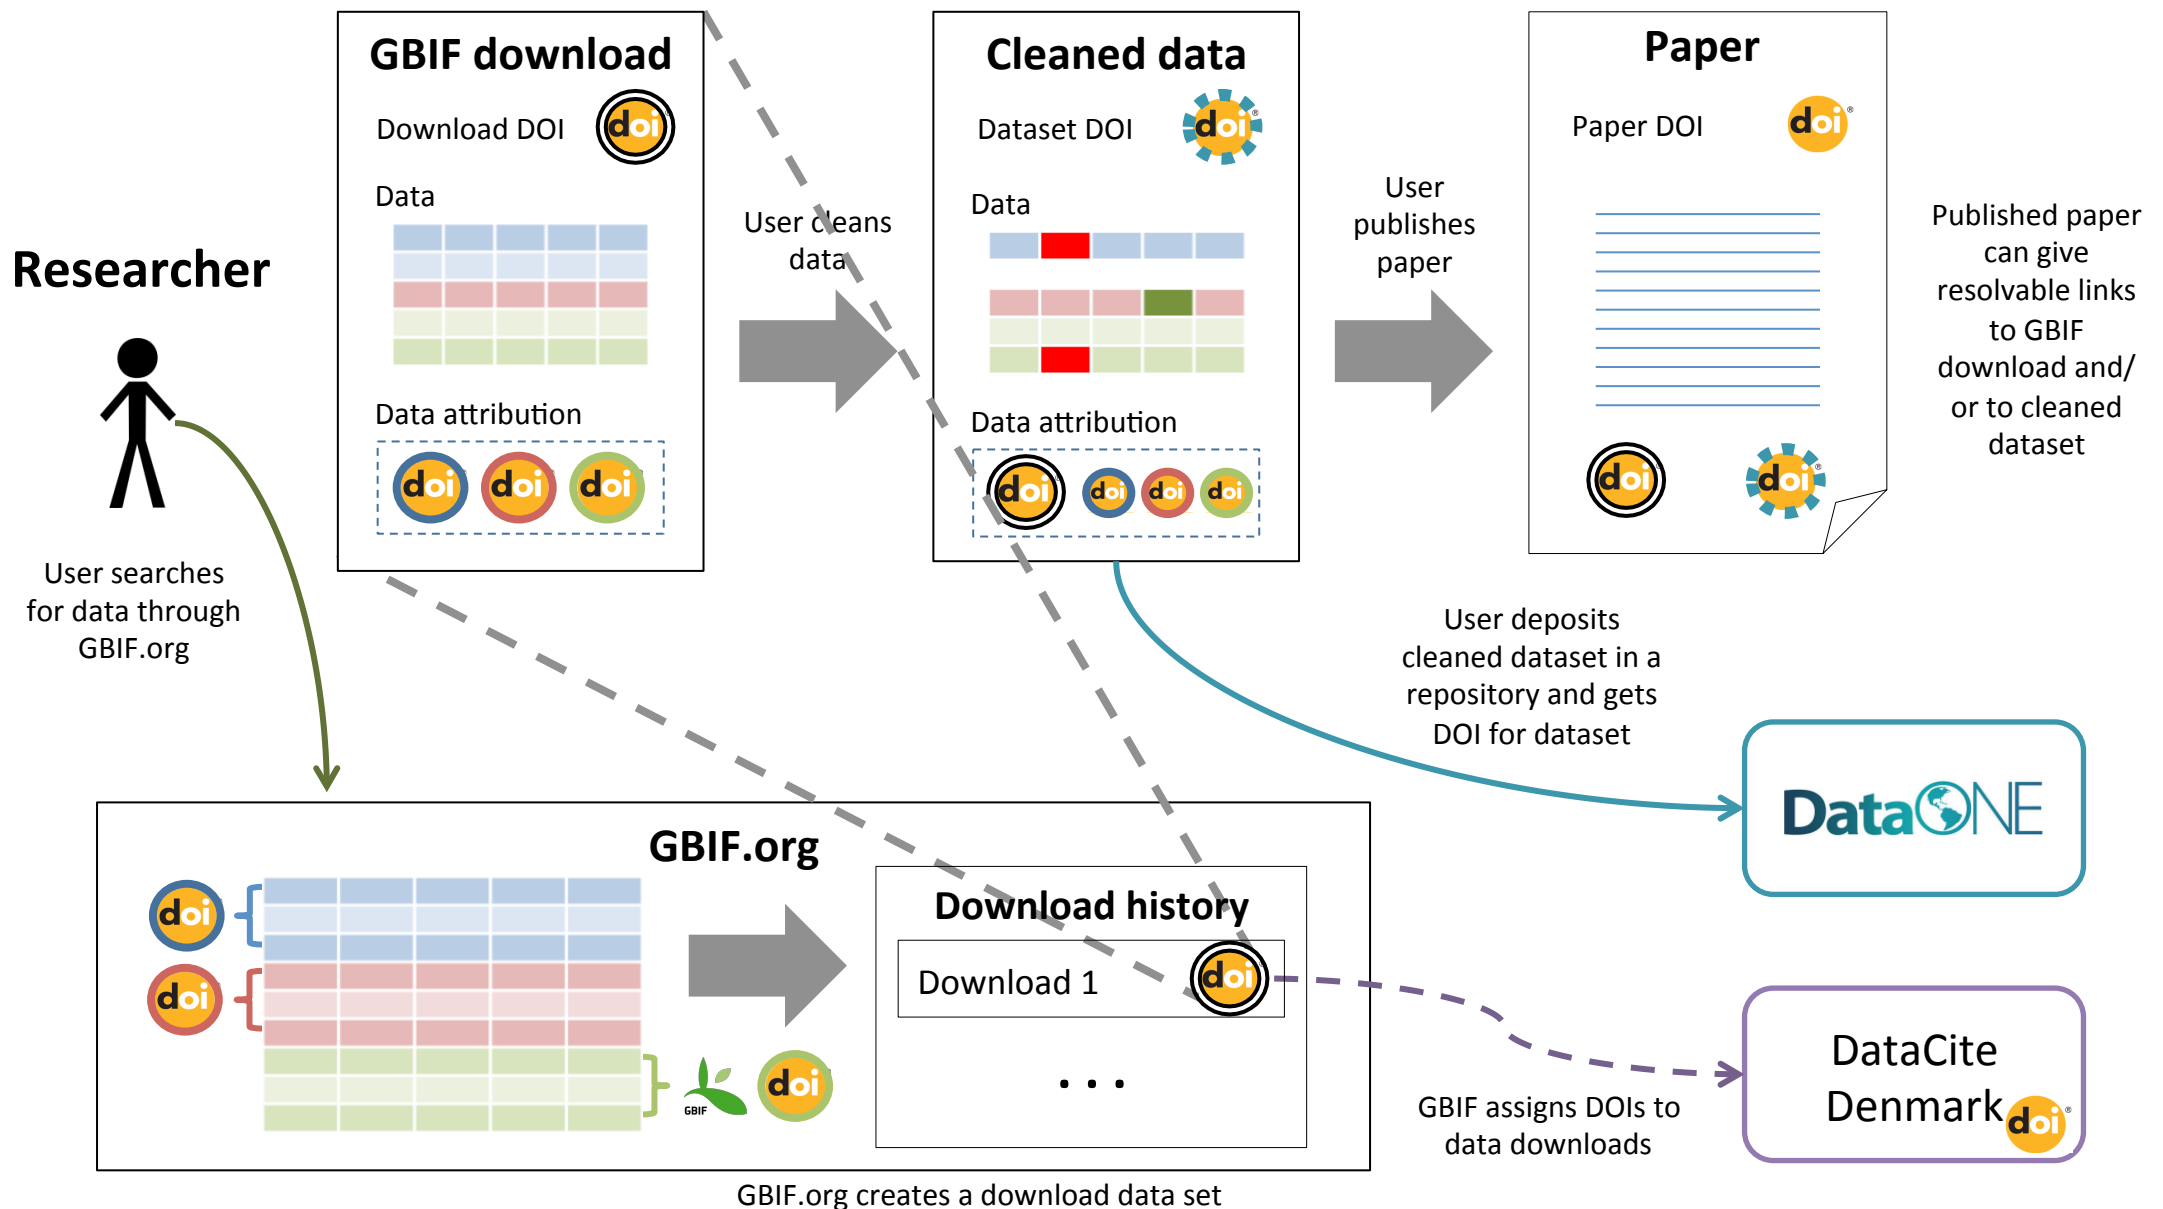

### Publisher uses IPT to register dataset with DataCite

Publisher establishes DOI externally

**Data Publishers**

Publisher does not provide DOI

# GBIF & DIGITAL OBJECT IDENTIFIERS (DOI)

# BIBSYS IS THE NORWEGIAN MEMBER IN DATACITE

*"As a **DataCite** member **BIBSYS** act as a national DataCite representative in **Norway** and thereby allow all of Norway's higher education and research institutions to use **DOI** on their **research data**".*

- Resource must be citation-worthy
- Resource must have good metadata
- Long-term archiving and accessibility for data

<http://www.bibsys.no/rammeverk-for-doi/>

# **Services to enable data analysis**

## LifeWatch Virtual Research Environment (VRE)

*Proposal submitted for creating a **LifeWatch Norway***

- [LifeWatch.no](http://LifeWatch.no) proposal is based on the robust GBIF infrastructure and GBIF data publishing services/mechanisms
- Creating new services and work-flows for **analyzing ecological data**
- Contribute to international GBIF standards for **new data types**

*A LifeWatch Norway will substantially strengthen the societal benefits and capitalization of the Norwegian investments in GBIF.*

# GBIF DATA PORTAL API

An interface to access data published through the GBIF network using **web services**.

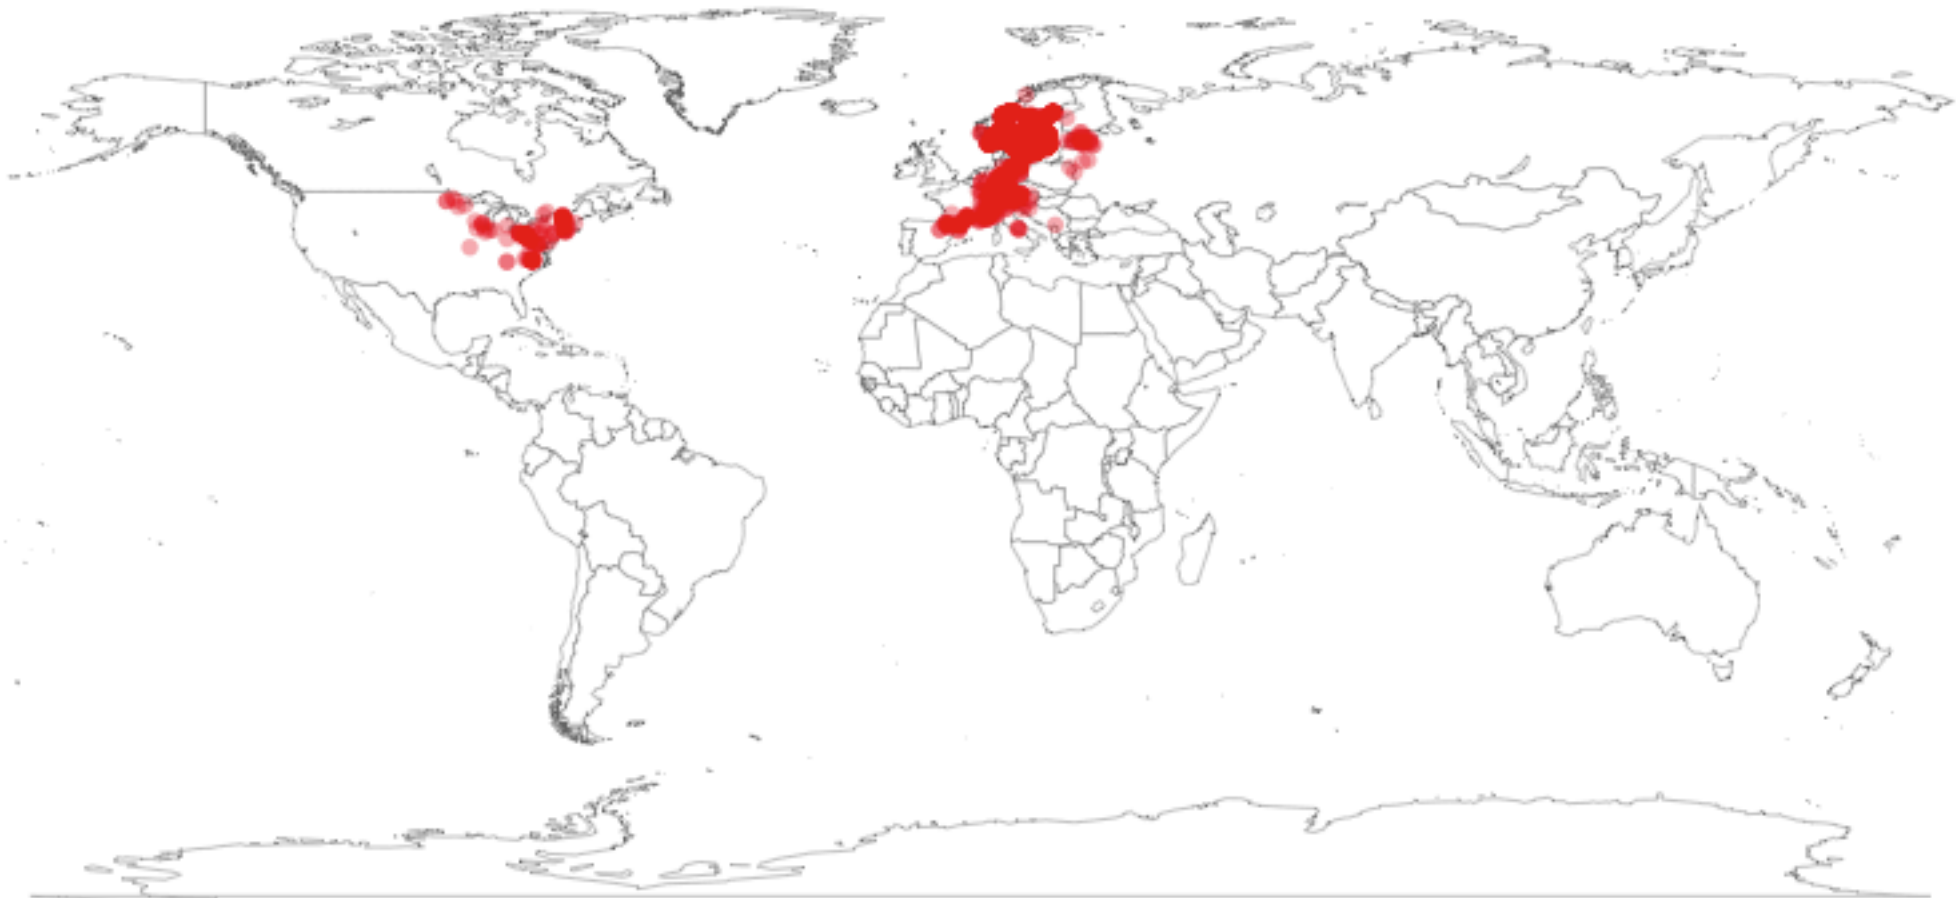

<http://api.gbif.org/v1/>

# ROPENSCI : RGBIF

```
library(rgbif)
key <- name_backbone(name='Hepatica nobilis', kingdom='Plantae')$speciesKey
sp <- occ_search(taxonKey=key, return='data', hasCoordinate=TRUE, limit=1000)
gbifmap(sp)
```

# CITATIONS IN PEER-REVIEWED RESEARCH

*Annual number of peer-reviewed publications using GBIF-mediated data*

**GBIF Norway**  
**[www.gbif.no](http://www.gbif.no)**

# DATA—BY GBIF PARTICIPANT

Status May 2016
